

16th EPSRC RESEARCH METHODOLOGY WORKSHOP

Wolfson College, Cambridge

This event is aimed at first year doctoral researchers and will equip research students with an appreciation of research design, methods and how to overcome potential challenges ahead.

This event features:

- an introduction to research methods and research framework development,
- project feasibility factors, such as time management
- approaches to working with industry
- an introduction to case methods and action research
- small interactive discussion group sessions, and
- networking opportunities, which includes Indoc delegates

2nd EPSRC INDUSTRIAL DOCTORAL COMMUNITY CONFERENCE

Newnham College, Cambridge

This event seeks to provide greater understanding of the skills and competencies required for effective engagement with practitioners. It will appeal to doctoral researchers who are mid stream or final year – seeking to obtain greater value from industrial / government relationships.

This event features:

- exploration of industry needs and future competitive challenges, in relation to doctoral research
- expert speakers, sharing insight behind working with industry
- problem structuring and industry collaboration methods
- doctoral skills for industry workshop – designed to inform government investment decision-making in skills development

MARCH 31 – APRIL 1 2009

These events are aimed at researchers with interests in technology, management or policy related disciplines
