

# Improve efficiency, collaboration, and compliance with Cayuse

## At Cayuse, we bring order to chaos

Our cloud-based connected ecosystem reduces administrative burden and inefficient workflows helping you optimize across all areas of research, from pre-award and post-award, to risk and resource management. We can help you:

- minimize risk
- maximize efficiency
- optimize planning

More than 60% of the world's top research organizations trust Cayuse

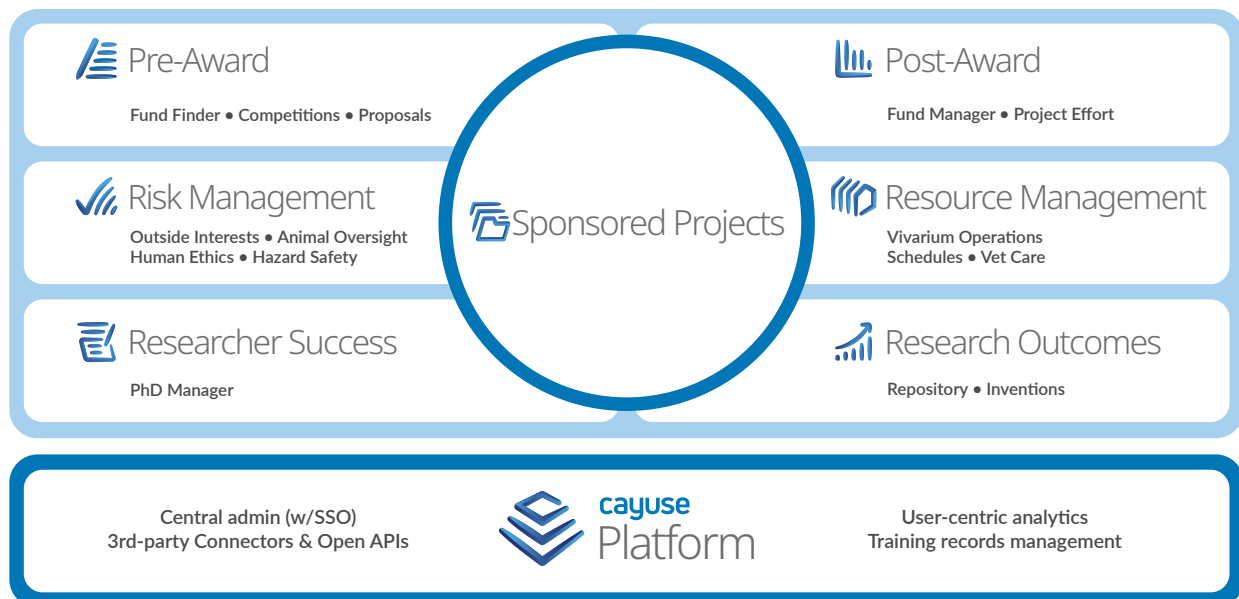

**ILLINOIS STATE UNIVERSITY**  
*Illinois' first public university.*

**"Cayuse's integrated research suite allows for the research enterprise to be more cohesive. We eliminated thousands of administrative hours annually while growing. Now more resources can go to the investigators."**

**Jason Wagoner**  
Director of Research and Sponsored Programs  
Illinois State University

## The Cayuse Connected Research Cloud Platform drives impact across the entire hierarchy of challenges

# Everything you need in a single cloud-based research suite.

## Pre-award

Grow your research portfolio, comply with changing regulations, and reduce administrative burden with Fund Finder by Pivot, Competitions, and Proposals (S2S).

- Create, route, and submit proposals more quickly
- Easily build budgets and projects
- Reduce errors and compliance risk

## Post-Award

Manage your portfolio, oversee grant spending and effort certification, monitor financial health, and spend-down with Fund Manager and Project Effort.

- Improve budget oversight for multi-year sponsored projects
- Collaborate, share, and integrate data with pre-award personnel and other departments
- Generate financial reports, burn rates, P&L reports, and project future-year expenditures

## Risk Management

Identify risks, monitor progress, and preserve integrity without slowing down the science with Outside Interests, Animal Oversight, Human Ethics, and Hazard Safety.

- Protect subjects, researchers, and your institution's reputation
- Electronically prepare, submit, and route studies for committee approval
- Quickly review critical info, reduce errors, and mitigate risk

## Our new apps drive research impact and outcomes and improve post-graduate program success.

### Repository

**Cayuse Repository** offers a single location to manage all research outputs through easy-to-use integrated workflows that streamline processes and increase engagement.

### Inventions

**Cayuse Inventions** reimagines the lab-to-market process related to technology transfer, IP management, and research commercialization.

### PhD Manager

**PhD Manager** makes postgrad program management easier from supervision meetings and progression monitoring to examinations management and reporting.
