### **Endorsement of Researcher Development Framework**

SCONUL is delighted to offer our endorsement of the Research Development Framework, which provides an important tool in helping to develop the skills of the next generation of researchers.

In particular, we welcome its contribution the promotion and development of information literacy among researchers, and the breadth of focus in encompassing knowledge and skills.

We look forward to continuing to work with Vitae to identify and support the needs of the UK research population.

Regards

Ann Rossiter  
Executive Director
