

Knowledge Exchange lens on the Vitae Researcher Development Framework

Lens development

The knowledge exchange lens on the Vitae Researcher Development Framework draws from a range of expertise and experience including the AURIL/Jisc Professional Development Framework for Business and Community Engagement, and through consultation with universities and other key organisations working in the area of knowledge exchange.

About AURIL

AURIL is the professional association representing all practitioners involved in knowledge creation, development and exchange in the UK and Ireland who work to ensure that new ideas, technologies and innovations flow from their institution into the market place. It is the largest knowledge transfer association in Europe, with more than 1600 members from universities, NHS Trusts and public sector research establishments.

www.auril.org.uk

The AURIL/Jisc Professional Development Framework for Business and Community Engagement (BCE) recognises that engagement professionals service the needs of business, the community and their own internal organisation and these services share many core elements.

In the Professional Development Framework these key elements are used to describe:

- The Purpose of BCE
- The Aims and Drivers of BCE
- The Landscape of BCE

How to use the knowledge exchange lens

Researchers may wish to use this lens to:

- identify how knowledge exchange can contribute to their professional development as a researcher
- identify how the skills and attributes they have developed through research can contribute to, or underpin their development in knowledge exchange activities
- select areas that they need to develop to be more effective in knowledge exchange activities and use this to inform development reviews
- provide evidence of the transferability of their knowledge exchange skills in their CV, in job applications and at interviews.

Researcher developers may wish to use this lens to:

- demonstrate to researchers and other stakeholders how knowledge exchange activities can contribute towards the overall professional development of researchers
- enable researchers to recognise the learning they have acquired through knowledge exchange related activities and highlight the transferability of these abilities
- strategically align knowledge exchange learning and development provision around the lens.

To protect and maintain the integrity of the Vitae Researcher Development Framework (RDF) and the Researcher Development Statement (RDS)¹ and to ensure a consistent approach to the development of lenses on the RDF, anyone wishing to create a lens on the RDF should seek permission from Vitae, and must adhere to the RDF conditions of use². Enquiries regarding the development of a lens on the RDF should be directed to rdf@vitae.ac.uk

For further information about the range of Vitae activities go to www.vitae.ac.uk or contact website@vitae.ac.uk

Vitae is led and managed by CRAC: The Career Development Organisation. Between 2013 and 2015 we were supported by Research Councils UK (RCUK) and UK HE funding bodies

Knowledge Exchange lens on the Vitae Researcher Development Framework

Overview

The Vitae Researcher Development Framework (RDF) underpins a major new approach to developing world-class researchers. The framework has been developed by and for researchers working in higher education as an aid to planning, promoting and enhancing professional and career development. It articulates the knowledge, behaviours and attributes of successful researchers and encourages all researchers to realise their potential.

This is one of a series of lenses on the Vitae Researcher Development Framework.

For further information about the Vitae Researcher Development Framework visit www.vitae.ac.uk/rdf

For further information about the AURIL/Jisc Professional Development Framework for Business and Community Engagement (BCE) visit www.auril.org.uk

Supporting materials relating to this lens are available at www.vitae.ac.uk/rdf/lenses

Purpose of a lens

This lens highlights the importance of knowledge exchange in the professional development of researchers. The AURIL/Jisc Professional Development Framework for Business and Community Engagement¹ has been reviewed in the development of this lens. The lens provides an overview of the key knowledge, behaviours and attributes typically developed by researchers that can be acquired through or used in knowledge exchange activities.

Context

With the significant Government investment in higher education, researchers are now required to apply the results of their research and move them into the public domain. Knowledge Exchange (KE) provides a means of demonstrating how investment in research benefits society and impacts economies.

Research generates new knowledge and you may be expected to transfer your good ideas, research results and skills to other research organisations, business, the charitable and public sectors and/or the wider community. Knowledge Exchange activities can help raise your profile within your university, nationally and internationally. Knowledge Exchange is important to funders, and the UK Research Councils have drawn up a set of principles to encourage good practice.²

Describing Knowledge Exchange

Within this lens, knowledge exchange is defined as

“a two-way mutually beneficial process through which knowledge, know-how, expertise and skills are transferred from one party to another leading to innovative, social and economic improvement.”

Baines, L and Lock D, 2010
